**MMR could be higher. Tiered margining is in place for larger position sizes on Forex trading platforms, please refer to Market Information in the trading platform for more information.

**Margin requirements are subject to change without notice, at the sole discretion of Forex.

**Should you have a position that is subject to an additional margin requirement we will contact you to make arrangements to cover it. This increased margin requirement will continue to apply at Forex's discretion, until the position size decreases and remains materially below the threshold for a sustained period. Partially closing the position will not automatically reduce your margin requirement.

**Open positions are always required to be margined.

**While it is not Forex's policy to hold clients responsible for modest negative balances, we do reserve the right to hold clients responsible for large debit balances and when special circumstances apply. For this reason, we strongly encourage you to manage your use of leverage carefully. Increasing leverage increases risk.
